

COVID-19 TESTING IF YOU ARE VACCINATED

| COVID-19 |

You did your part by getting vaccinated, but you still have an important role to play in stopping this pandemic.

Even though it's rare, some people who are vaccinated still get COVID-19.

So, if you have symptoms, especially if you've been around someone with COVID-19, you should get tested.

By getting tested you protect the people around you, including your loved ones.

Encourage your friends and family to get vaccinated.

Remember, if you feel sick, get tested.
