## ARTIST STATEMENT in VENEZUELAN SIGN LANGUAGE VIDEO

He presents us with his fears or inner monsters that do no harm if we do not allow it. He recreates cartoons that he remembers from his childhood and thus captures them on canvas, bottles... His hearing disability gives him access to a forbidden universe for many of us: silence... his inner and viral sounds

"Silence is the most complete sound of all because it is like God: you don't hear it, you don't see it, but it is within your own being", says Rosa Zambrano.

In the review of her work, Rosa Zambrano reflects on knowing her world, and what inspires and moves her. There are tunes that the speaking man cannot understand, they cannot come out of those 7 musical notes that I do not hear but I perceive them, therefore those of us who do not hear vibrate with the universe where everything is healthy. Of the two main elements of music, melody, and rhythm, I can perfectly understand the second... An open field to begin to understand other notes, other sounds. In the inner ear, I have a musical thought without needing to hear it, I feel the sound body that lives the rhythm like no one else. It's not loud, it doesn't hurt me. So I feel the silence to the rhythm of my own body, the organs of my body have sounds... I touch my heart and there is music. I go to the sea and that is when I understand that we are all the same under it. No one. Listen and we become one"
